Introducing a pow of frontline technology an

The most advanced Rover driving experience.
The Rover name stands for innovative design, performance, prestige, technological development and achievement. And never more so than now: with the introduction of the new Rover V8 Vanden Plas.

Heralding a new era in automotive engineering, the Vanden Plas offers prestige and effortless high performance and a new dimension in modern efficiency.

Vanden Plas

Vanden Plas — a traditional standard of luxury
Since the early nineteen hundreds, the coachbuilding teams of Vanden Plas have set the highest standards in luxury and interior and exterior craftsmanship.

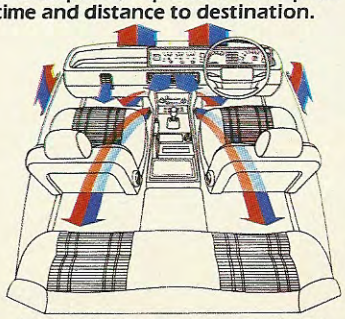
Today, their early achievements are mirrored in the fine finish and outstanding attention to detail of the Rover Vanden Plas.

Frontline technology for modern efficiency
Incorporated into the redesigned dash assembly, you'll find the nerve centre of the Rover Vanden Plas. This new, multi-function computer, with its attendant read-out display panel,

Electronic trip computer with dash panel readout.

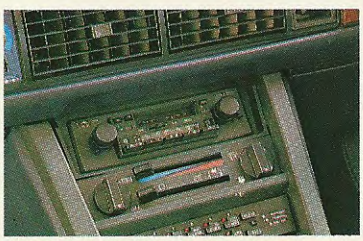
provides the answers to the ever increasing demands of today's discerning motorist.

Touch button read-outs are available for average speed, arrival time, instantaneous and average fuel consumption, trip distance, elapsed time and distance to destination.



Integrated air-conditioning is standard equipment.

Electric window controls.



Fitted radio/stereo tape-deck as standard.

Cruise control for maximum fuel efficiency.

y finished with hairline woven velvet upholstery.

Control and warning lights in comprehensive dash display.

Traditional craftsmanship and attention to detail
The prestige and luxury of the Rover Vanden Plas is obvious. The gleaming coachwork, matt black bumpers and new side rubbing strips. The redesigned and lowered rear window with its wash/wipe system adds a further touch of practicality and looks.

Inside the Vanden Plas you'll notice a high degree of innovative change. There is a completely redesigned fascia panel. Genuine polished burr walnut insets match those on all four doors. There is a new high quality radio/stereo cassette player. A neat and efficient cassette tape holder, even a cigarette lighter for rear seat passengers.

For fuel economy over long distances, there's electronic cruise control. Upholstery is the essence of luxury with hairline woven velvet "Scotchgarded" seats. Each seat has an individual head restraint.

There's also central door locking operating on all doors for practicality and safety.

V8 — The power of silence
Under the bonnet of the Vanden Plas is the superb Rover V8 3500 workhorse. Providing sparkling performance, its fuel efficiency is highly creditable. Available in either 5 speed manual or 3 speed automatic transmission, the aerodynamic body design gives a silence to your motoring that belies the power available.

The Rover experience
The Vanden Plas is the ultimate Rover driving experience. Today's Rovers represent the finest in a long and distinguished line of outstanding designs.

The Rover experience is ready for you.
